Handheld Wireless Mini B & Color Doppler Ultrasound Scanner
Product introduction

How it works
The wireless probe is a mini ultrasound scanner without a screen. We minimize the components of a traditional ultrasound into a small circuit board built into the probe, and showing image in smart phone/tablet through Wifi transferring. Rotate built-in screen probe is a wireless ultrasound probe add screen, image can both show in screen and tablet. Image transferring through internal wifi from probe, no need external Wifi signal.

Product advantage
- Small and small size, easy to carry.
- Wireless type without probe cable, working freely.
- Waterproof design, convenient for sterilization.
- Remote diagnostic convenience, capability and easy image transfer.

Ultrasonic diagnostic equipment miniaturization, intelligent development:
Trolley >> Portable >> Palm >> Pocket Wireless >> Pocketket

Only a probe! Just connect smart phone/tablet by wifi and it becomes a small B/Color Ultrasound Scanner.
Product series

Gray head: low configuration B/W ultrasound scanner; Light blue head: high configuration B/W ultrasound scanner; Purplish blue head: Color Doppler; For large order we can customize colors.

**Convex series**
Wide and deep scanning scope, suitable for abdomen, obstetrics, gynecology and cardiology exam.

**Linear series**
Parallel imaging, high frequency detection range is small and shallow but with high definition, suitable for small parts, superficial tissue examination.

**Double heads series**
Double probe heads, one probe can meet the needs of multiple clinical tests, more convenient and lower overall cost.

**Mini-Ultrasound Scanner**
Built-in screen, option for synchronous display on smart phone or tablet.

**Transvaginal series**
Quick follicular detection, uterine examination and visualization guidance in obstetrics and gynecology.

**4D bladder probe**
Real-time three dimensional scanning for urinary bladder volume measurement.
Specifications

- Scanning mode: Electronic array
- Frequency: Convex/micro-convex probe 3.5/5.0MHz, Linear probe 7.5 MHz/10.0MHz or 10/14MHz, Transvaginal Probe 6.5MHz, 4D bladder probe 3.5MHz
- Depth: convex 100mm~280mm, micro-convex 100mm~200mm, linear 20mm~55mm, transvaginal 50mm~100mm, adjustable
- Radius of curvature and angle of scanning: Convex R60/60°, Micro-convex R20/88°, Transvaginal R10/149°
- Scan width: Linear 7.5MHz is 40mm, 10MHz is 25mm
- Screen size of built-in screen probe: 3.5 inches
- Display mode: B, B/M, color, PW, PDI
- Image adjustable: gain, focus, anti-phase pulse harmonics, noise reduction, DYN
- Puncture assist function: in-plane puncture guide line, external puncture guidance automatic blood vessel measurement, and the enhance needle visualization function needle point development.
- Battery working time: 3 hours
- Charging mode: USB charging or wireless charging.
- Measurements: Distance, area, circumference, angle heart rate, obstetrics.
- 4D bladder probe automatic volume measurement: range 10ml~2000ml, error < 5%, speed 2s.
- Size: Convex/linear 156mm×60mm×20mm, transvaginal 296mm×60mm×20mm, 4D bladder probe: 180mm×80mm×60mm
- Weight: Convex/linear/Micro-convex: 278g, 4D bladder probe: 420g, transvaginal 300g
- Image frame rate: 20fps
- Connection type: probe connects to smart phone/tablet by built-in wifi
- Wifi type: 802.11n/2.4G/5G/450Mbps
- Consultation function: remote internet consultation through smart phone and tablet, as well as multi-cell phone/tablet for consultation.
- Working system: Apple iOS, Android and Windows
Usage

1. For iPhone/iPad, please search "WirelessUSG" in Appstore and download. For Android, please download from our website or copy from another smart phone/tablet.

2. Press the probe button to start up, then open the Wi-Fi of the smart phone/tablet, select the Wi-Fi from the probe, and enter the password as the probe serial number in lower case letters (e.g: SN: C1234567, the password is c1234567, don't input "SN").

3. Open the installed software and begin use. Reminder: a long button press is shutdown and a short press is freeze..

Install software
Scan QR code, or search "WirelessUSG" in Appstore and download

Smart phone became a ultrasound scanner

Accessories

- Bluetooth Printer
- Needle puncture guide
- Android tablet/iPad
- Smart glasses
- Trolley
- Disposable probe cover
- Needle guide
- Wireless charger
- Tablet bracket
Clinical application

Clinical value
Precision medical visualization tool, first aid quick examination, basic examination, wireless ultrasound probe is not only help the medical workers to improve working efficiency, reduce labor intensity and working pressure, but also improve diagnostic confidence and treatment. Minimize diagnostic and treatment errors, complications, sequelae, medical accidents and disputes.

Application directions
2. Emergency inspection: ER, ICU, Wild First Aid, battlefield rescue.
3. Preliminary examination: Ward Inspection, primary clinic examination, medical examination, health screening, home care, family planning, etc.
4. Remote diagnosis, consultation, training: works on smart phone or tablet, easy telecommunications.

Applicable Clinic
Anaesthesia, pain, ICU, urology, nephrology, cardiology, rehabilitation, orthopedics, gynaecology, reproductive, obstetrics, neonatology, pneumology, gastroenterology, hepatological surgery, general surgery, vascular surgery, thyroid surgery, skull surgery, neurology, transplantation, ophthalmology, dermatology, emergency, nursing, inpatient, physical examination, and ER ambulance, primary care, family planning centers, family medicine, home care, nursing home, prisons, plastic surgery, small needle knife/acupuncture treatment clinic, sports medicine, battle field ambulance, disaster ambulance, etc.

Example of usages
Puncture/intervention guide: thyroid ablation, neck vein puncture, subclavian vein puncture, and neck and arm nerves, canal of arantius, spine puncture, radial vein injection, percutaneous renal surgery guide, hemodialysis catheter/thrombosis monitoring, abortion, bile duct puncture, hydroaspiration extraction, pain therapy and cosmetic surgery, urine catheterization.

Emergency inspection: internal bleeding, pleural effusion, pneumothorax, Atelectasis of lung, Temporal / posterior auricular fistula, pericardial effusion.

Daily inspection: thyroid, breast, liver cirrhosis, fatty liver, prostate/pelvis, stroke screening, retinal artery, uterus, follicular monitoring, fetus, musculoskeletal, podiatry, fractures, varicose veins, spleen, bladder/urinary function, urine volume measurement.
